

CHAPTER 11

FACULTY/STAFF/ADMINISTRATION

Employees

The data in this chapter are obtained from the California Community College Chancellor's Office regarding PCC employees. The data include all employees except hourly unclassified employees and student workers. Academic temporary faculty, which are adjunct (hourly) instructors, represent nearly half (48%) of the employees in this data set. Tenured or tenure track faculty and classified support staff are approximately the same size, each representing about a quarter of all employees. Educational and classified administrators account for 3% of employees. Data for the past five years are provided in most cases. The exception is data on ethnicity as presented on pages 178 and 179. In this case, only data for the past four years were presented, because of space limitation.

Gender

In Fall 2007, female employees outnumbered male employees by four percentage points. There were more female than male classified support employees and tenured/tenure track faculty. There were more male than female educational administrators and academic temporary employees (adjunct faculty). In Fall 2007, 56% of the educational administrators were male, while the percentage was 62% the year before. In contrast, 44% of the educational administrators were female in Fall 2007, a six percentage point increase from that of the previous year. Gender composition has remained very stable for classified administrators for the last five years, with 58% being female.

Ethnicity

In Fall 2007, the majority (59%) of PCC's employees were Whites, followed by Hispanics, Asians, and African Americans. As can be seen in Figure 11-5, of the different employee categories, classified support had the most even ethnic mix. The ethnic categories reported here are from the California Community College Chancellor's Office and vary slightly from the categories used at PCC.

Figure 11-5 shows the ethnic composition in percentages of Classified Support, Tenured/Tenure Track, and Academic Temporary employees for the past four years. Due to the small count of Educational Administrators and Classified Administrators, these two categories are reported in numbers rather than percentages.
