

CHAPTER 1

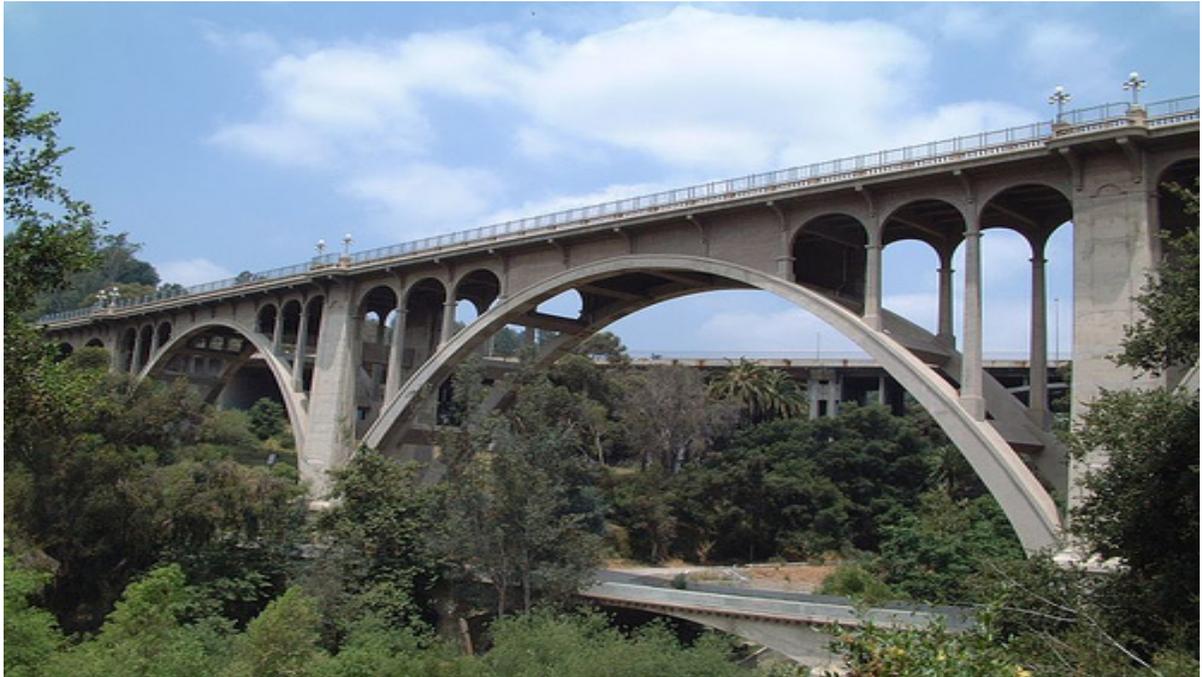

OUR COMMUNITY

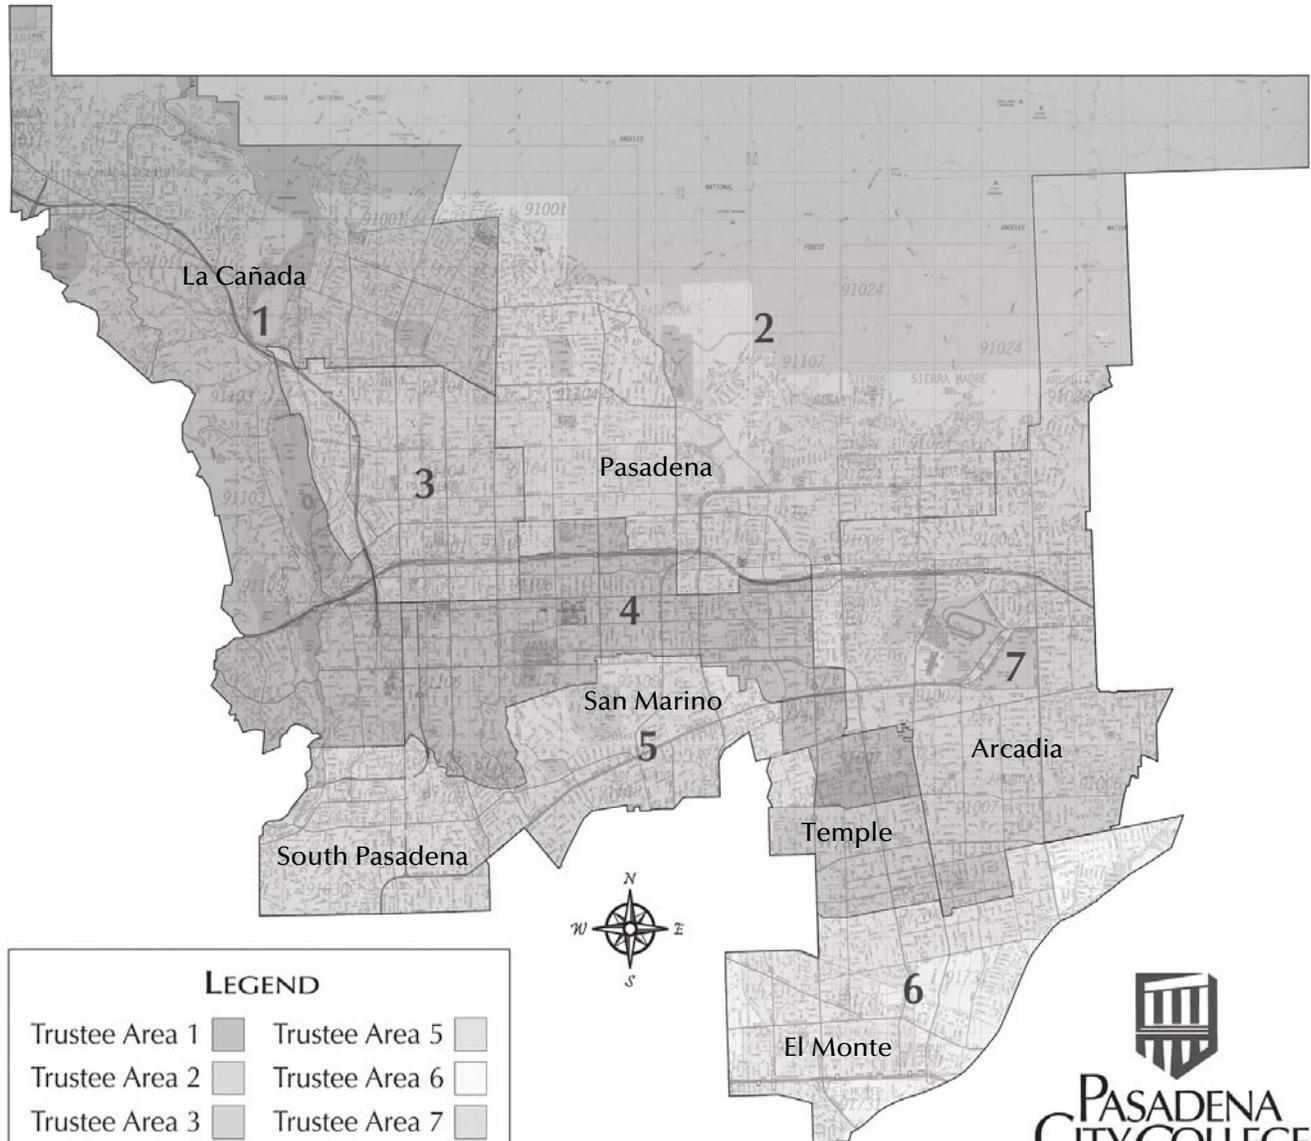

Service Area

Pasadena City College (PCC), established in 1966, is one of the largest community colleges in the nation in terms of enrollment. PCC is a one-college district, and its district is the Pasadena Area Community College District (PACCD). In addition to its main campus, PCC also has a Child Development Center and a Community Education Center (CEC). PCC's total enrollment for both credit and noncredit students in Fall 2007 was 29,636.

PACCD is geographically located in the Western San Gabriel Valley of Los Angeles County and composed of several school districts including Arcadia, a portion of El Monte, La Cañada, Pasadena, Rosemead, San Marino, South Pasadena, and Temple City. As of the 2000 US Census, the population in PACCD's geographic area totaled 391,305. PACCD is governed by an elected seven-member Board of Trustees. The map on the right shows the communities of PACCD along with the seven trustee areas.

Residency and Cities

As shown in Figure 1-1, the majority (63%) of PCC's credit students reside in other California Community College Districts (CCCD). Less than one third (31%) of credit students reside within the PACCD area. The remainder of the students have out of state, foreign, or nondistrict residency. The resident nondistrict category consists of individuals who are not legal residents of California, but per AB-540 are counted as residents for apportionment purposes.

As Table 1-1 shows, the greatest proportion of PCC students come from the City of Los Angeles, followed closely by the City of Pasadena. Of the top 30 cities, San Gabriel has the highest participation rate, followed by Pasadena. The participation rate is the ratio between PCC credit students who reside in a specific city and the population of adults 18 years of age or older who reside within that city (based on the 2000 U.S. Census data).

97	0.4	WHITTIER	Rio Hondo	0.2
93	0.4	GLENDORA	Citrus	0.3

Note: For the cities with a "n/a" under the participation rate column, the data on the population for those locations were not available.

Ethnicity

According to 2000 U.S. Census data, the PACCD area is an ethnically diverse area without a majority ethnic group. The largest ethnic group is White, accounting for approximately 40% of the PACCD area population. Hispanics and Asians/Pacific Islanders each account for about a quarter of the population. African Americans represent about 9% of the area population. For the first time, a multiple racial group was included in the 2000 Census. In the PACCD area, 3% of all residents are of two or more races.

From 1990 to 2000, the ethnic distribution of both the population within the District's geographic area and the student population at PCC has changed in similar ways. In both cases, as Figure 1-3 shows, the proportion of Whites in the PACCD area and at PCC decreased, while the proportions of Asians/Pacific Islanders and Hispanics rose. The proportion of African Americans showed a slight decrease. It is also interesting to note that proportionally, there are more Asians/Pacific Islanders and Hispanics at PCC than in the PACCD area, while Whites are underrepresented in the college enrollment. African American enrollment most closely matches the proportion in the PACCD area population of all ethnic groups.

Ethnicity

Participation Rates by Ethnicity

The participation rate is the ratio between PCC credit students who reside within the PACCD area and the population of adults 18 years of age or older who reside within the PACCD area. Overall, African Americans have the highest participation rate, followed by Asians/Pacific Islanders and Hispanics. Whites have the lowest participation rate. Participation rates for different ethnic groups vary significantly by zip code and city. Table 1-2 shows the participation rate of each ethnic group within each of the zip codes that comprise the PACCD area for the terms Fall 2007 and Spring 2008.

91775	San Gabriel	6.4	4.9	3.8	1.8
91780	Temple City	5.2	5.2	3.6	1.7
	<i>Overall</i>	4.7	4.5	3.4	2.0

Participation Rates by High School

The high school participation rate is the ratio between the number of graduates from a specific high school who enroll at PCC within two years (including summers) and the total number of graduates from that same high school, therefore the most recent year for which data is available is 2005. From 2003 to 2005, participation rates for several of PCC's main feeder high schools have been declining, including Pasadena, John Muir, Blair, South Pasadena, etc.
